

New Project Wizard

[Back](#)

Clone Git Repository

Repository URL:

Project directory name:

Create project as subdirectory of:

[Browse...](#)

☐ Open in new session

[Create Project](#) [Cancel](#)

**Paste the
GitHub repo
URL here**

Add a name for the local repo
(it helps to use the same name as the
remote repo)

**Navigate to the folder where you want
the local repo to live (the new repo will be a
folder *inside* of the directory you select here)**

**Click "Create Project" when
you're finished with the setup**
